Facility Info

Reporting Period: 1/1/2023 to 12/31/2023

Name of the Facility

Dairy Name: West Creek Dairy WDID 5C16NC00033

Facility Address: 8409 5th Ave. Hanford, CA 93230

Original Operation Date: 5/5/2005

Facility APN's: x140 x120 x026 xxxx

RWQCB Basin Plan Designation:

☐ Check if any information has changed

Owner(s)

Owner(s) Name: Ben Dragt

Mailing Address: 8157 5th Ave. Hanford, CA 93230

Home Phone Number: 559-280-9363

Cell Phone Number:

☐ Check if any information has changed

Operator(s)

Operator(s) Name: Same as owner

Mailing Address:

Home Phone Number:

Cell Phone Number:

☐ Check if any information has changed

Herd Information

	Milk Cows	Dry Cows	Bred Heifers (12-24 mo)	Heifers (3-12 mo)	Calves (0-3 mo)
Open Confinement:	-	193	643	540	280
Number Under Roof	1,389	-	-	-	-
Maximum Number	1,389	193	643	540	280
Average Number	1,389	193	643	540	280
Average Live Weight (lbs)	1,400	1,450	950	630	

Average Milk Production: 68

Predominant Milk Cow Breed: Holstein

Manure Generated:

Total manure excreted by the herd:	5,759.43	@40% Moisture	*ton/yr*
Total nitrogen from manure:	632,389		*lbs*
	30,828		*lbs*
	105,697		*lbs*
Total salt from manure:	-		*lbs*

After Ammonia (30% loss applied)

442,672 *lbs per reporting period*

Process Wastewater Generated:

Process wastewater generated:	20,279,400	*gal*
Total nitrogen generated:	67,749	*lbs*
	28,137	*lbs*
	115,739	*lbs*
Total salt (TDS) generated:	545,759	*lbs*

Notes

Without allowance for the significant amount of rainfall during the winter months of 2022/2023, the irrigation logs on each field page of the annual report, reflect canal and/or well used only during that time frame. The facility did not irrigate during the "Significant Storm Events".

It is inaccurate to present "salt" application without acknowledging that there is substantial uptake and utilization of "salts" by crops. If it is possible to calculate "salt" application, it is also possible to calculate "salt" utilization. That calculation should be included in this report. To calculate "salt" utilization is a lengthy process and cannot be done with the constituents required in the Revised General Order sampling requirements.

The signature(s) affixed to this report does not affirmatively refer to those references to "salt" that we know to be incorrect.

B.D. _____ *(Initial)*

Exception Reporting

Manure , Process Water and Other Dairy Waste Discharges:

The following is a summary of all manure and process water discharges from the production area to surface water or to land areas (land application areas or otherwise) when not in accordance with the facility's Nutrient Management Plan.

No, manure or process water discharges occurred during the reporting period

Storm Water Discharges:

The follow is a summary of all storm water discharges from the production area to surface water during the reporting period when not in accordance with the facility's Nutrient Management Plan.

No, storm water discharges occurred durging the reporting period

Land Application Area To Surface Water Discharges:

The following is a summary of all discharges from the land application area surface water that have occurred during the reporting period when not in accordance with the facility's Nutrient

No, land application area to surface water discharges occurred during the reporting period

Nutrient Management Plan (NMP) & Written Agreement Statement

Nutrient Management Plan Statement:

Was the faciltiy NMP updated in the reporting period? Yes

Was the facility's NMP developed and approved by a certified nutrient management specialist? Yes

Written Agreements:

Are there any written agreements with third parties to receive manure or process water that are new or were revised within the repoting period? No

Owner and/or Operator Certification

**I certify under penalty of law that all information submitted as part of this document is accurate and true. Certification signatures by a California Registered Professional have been supplied as needed in Part II. I have personally examined and am familiar with the information submitted in Parts I and II of this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.*

Re: Evaluation of Nutrient Budget for 2023
West Creek Dairy

Dear Ben,

Enclosed is the 2023 Nutrient Budget for your dairy to satisfy the Regional Water Quality Control Board General Order No. R5-2013-0122 (reissued R5-2007-0035).

Collection of samples, analyses, and calculations were designed to evaluate the amount of nitrogen, phosphorus, and potassium applied to and removed from each field by the crop(s).

2023 Whole Farm Nitrogen Balance
The whole farm nitrogen balance was **0.54** in the 2022/2023 crop year.
The Nitrogen Summary Page shows a balance for each field and for the farm as a whole (Attachment 1)."

This chart explains the ranges:

Factor	Status	Evaluation
> 1.65	Excessive	Too much nitrogen applied
1.4 -1.65	Slightly High	Nitrogen is satisfactory to slightly high
0.9 – 1.4	Normal	Normal or slightly low
< 0.9	**Low**	**Low nitrogen status, additional nitrogen needed**

Background of Nitrogen Balance
California Regional Water Quality Control Board (RWQCB) dictates that the amount of nitrogen applied for the whole farm agricultural crops should not be greater than 1.4 times the amount of N removed by the crop.
If greater, that field will be out of compliance with the RWQCB standards. Evaluations revealing a factor of less than 1.65 are within the best management standards of farming.
It is assumed that extra N will travel to the water tables and surface waters, thereby polluting the drinking water aquifers.
Fields with nitrogen balance greater than 1.65 will need to be reviewed during the coming season to balance the nitrogen application
Corrections can be as simple as shifting a greater percentage of manure and/or process water to fields which are low in nitrogen.
Other options include exporting more nitrogen-containing materials from the dairy farm area or reducing the number of animals at the dairy.

Re: Nutrient Budget for 2023, Projected Nitrogen Budget for 2024, and RWQCB Nutrient Budget Supporting Documents

Dear Ben,

Enclosed is the Nutrient Budget for 2023, Projected Nitrogen Budget for 2024, and RWQCB Nutrient Budget Supporting Documents to satisfy the General Order No. R5-2013-0122 (reissued R5-2007-0035).
Please review our Evaluation of Nitrogen Budget for 2023 and Projected Nitrogen Budget for 2024 and let us know if there is any problem in the reports.

If satisfactory, please file all the documents.

These documents are not required to submit to the Board. However, All the documents must be maintained on the dairy for at least five years and must be made available to Regional Board staff in the event of an inspection.

If you have any questions, please call. It has been a pleasure serving you.

Sincerely,

Ben Nydam

I guarantee that as the client, or on behalf of the client named, I have the authority to contract the above requested services. Should it be found that I do not have such authority, I agree to be personally liable for all costs and, if there should be action against me for this breach, reasonable attorney's fees. It is understood that payment is expected to be cash with samples unless terms have been previously arranged. Terms are net 30 days, overdue accounts will be charged a finance fee of 2% per month (annually 24% or $5.00 per month whichever is greater).
If payment is not made when due and a legitimate dispute exists concerning the product or services of Dellavalle Laboratory, Inc., it will be submitted to mediation under the Rules and Procedures of Creative Alternative to Litigation, Inc. (CAL). If the dispute is not resolved at mediation then the dispute will be submitted to binding arbitration through CAL under its Rules and Procedures. The parties will equally bear the costs of mediation/arbitration. However, the mediator declares that no legitimate dispute exists, then either will pay all mediation and arbitration costs, and in the event of arbitration, reasonable attorneys' fees of Dellavalle Laboratory.

ATTACHMENT D

Manure/Process Wastewater Tracking Manifest
For
Existing Milk Cow Dairies

Instructions:

1) Complete one manifest for each hauling event, for each destination. A hauling event may last for several days, as long as the manure is being hauled to the same destination.
2) If there are multiple destinations, **complete a separate form for each destination.**
3) The operator must obtain the signature of the hauler upon completion of each manure-hauling event.
4) The operator shall submit copies of manure/process wastewater tracking manifest(s) with the Annual Monitoring Report for Existing Milk Cow Dairies.

Operator Information:

Name of Operator: Ben Dragt

Name of Dairy Facility: West Creek Dairy

Facility Address: 8409 5th Ave Hanford
Number and Street / City / Zip Code

Contact Person Name and Phone Number: Ben 280-9363
Name / Phone Number

Manure/Process Wastewater Hauler Information:

Name of Hauling Company/Person: B-Mello Ag Services

Address of Hauling Company /Person: _____
Number and Street / City / Zip Code

Contact Person: Bryan Mellow 816-3889
Name / Phone Number

Destination Information:

Composting Facility / Broker / Farmer / Other (identify) _____ (please circle one)

Contact information of Composting Facility, Broker, Farmer or Other (as identified above):

M:D Swanson P.O. Box 828 Kingsburg 93631
Name / Number and Street / City / Zip Code / Phone Number

Manure/Process Wastewater Destination Address or Assessor's Parcel Number:

Denver Ave W of 6th Ave
Number and Street / City / Zip Code / Assessor's Parcel Number

Dates Hauled: 2-4-23 : 2-5-23

Amount Hauled:

Enter the amount of manure hauled in tons or cubic yards (indicate the units used), the manure solids content (if amount reported in tons) or manure density (if amount reported in cubic yards), and the method used to calculate the amount:

Manure: 320 Tons or Cubic Yards (indicate which units used)
Manure Solids Content (if amount reported in tons): _____
Manure Density (if amount reported in cubic yards): _____

Method used to determine amount of manure: _____

_____

Enter the amount of process wastewater hauled in gallons and the method used to determine the amount.

Process Wastewater: _____ Gallons

Method used to determine volume of process wastewater: _____

_____

Written Agreement:
Does the Operator have a written agreement (in compliance with Land Application Specification C.2 of Waste Discharge Requirements General Order No. R5-2007-0035) with any party that receives process wastewater from the Operator for its own use? (please check one)

____ Yes _____ No

If the answer is no, the Operator agrees to have such a written agreement with any such party for any process wastewater transferred after **31 December 2007** to such party.
_____ (Operator shall provide initials here to acknowledge this requirement).

Certification:
I declare under the penalty of law that I personally examined and am familiar with the information submitted in this document, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violations.

Operator's Signature: _____ Date: 3-5-23

Hauler's Signature: _____ Date: _____

Manure: 2600 Tons or Cubic Yards (indicate which units used)
Manure Solids Content (if amount reported in tons): _____
Manure Density (if amount reported in cubic yards): _____

2023

ATTACHMENT D

Manure/Process Wastewater Tracking Manifest For Existing Milk Cow Dairies

Instructions:

1) Complete one manifest for each hauling event, for each destination. A hauling event may last for several days, as long as the manure is being hauled to the same destination.
2) If there are multiple destinations, **complete a separate form for each destination**.
3) The operator must obtain the signature of the hauler upon completion of each manure-hauling event.
4) The operator shall submit copies of manure/process wastewater tracking manifest(s) with the Annual Monitoring Report for Existing Milk Cow Dairies.
